DETAILED ACTION

1. This Office Action is in response to the Amendment filed 3/28/07. Claims 1, 2-7, 9-20, 22-32, 34-36, 38-44, and 46-49 are currently pending in the application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel McClure on 7/17/07.

The application has been amended as follows:

IN THE CLAIMS:

On line 3 of claim 20, a "," (comma) and the word "each" has been added between the word "packets" and the word "with" and the phrase "including first and second portions" has been added between the word "configuration" and the ";" semicolon, such that line 3 of claim 20 now reads as follows:

"a transmitter configured to transmit packets, **each** with a dual configuration **including first and second portions;**"

On line 8 of claim 20, the phrase "**the dual packet configuration including first and second portions,**" has been deleted and has been replaced by the phrase "**another mode in which**", such that line 8 of claim 20 now reads as follows:

"another mode in which the first"

On line 9 of claim 20, the word "**is**" has been added between the words "**portion**" and "**modulated**" and the word "**method**" has been deleted and has been replaced by the word "**technique**", such that line 9 of claim 20 now reads as follows:

"portion is modulated solely according to a serial modulation technique and the second"

On line 10 of claim 20, the word "**is**" has been added between the words "**portion**" and "**modulated**" and the word "**method**" has been deleted and has been replaced by the word "**technique**", such that line 10 of claim 20 now reads as follows:

"portion is modulated solely according to a parallel modulation technique, wherein the parallel"

On line 11 of claim 20, the word "**method**" has been deleted and has been replaced by the word "**technique**", such that line 11 of claim 20 now reads as follows:

"modulation technique is orthogonal frequency division multiplexing (OFDM)."

On line 3 of claim 36, the phrase “**operating in a first mode, including**” has been added before the word “**modulating**”, such that line 3 of claim 36 now reads as follows:

“**operating in a first mode, including** modulating a first portion of each packet solely according to a serial modulation;”

Allowable Subject Matter

3. Claims 1, 3-7, 9-20, 22-32, 34-36, 38-44, and 46-49 are allowed.
4. The following is an examiner’s statement of reasons for allowance:

Independent claims 1, 20, and 36 are allowable since none of the prior art of record discloses or renders obvious the claim limitation of transmitting a packet including a first portion modulated solely according to a serial modulation and a second portion modulated solely according to a parallel modulation that comprises OFDM.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
